

KESTRELATTICE

Governed Agent Mesh | Micro-Product

Denied-Action Log Template Pack

Log templates that turn every denied action into usable evidence. A complete, zero-placeholder draft for teams governing AI agents in production: policy gates, audit trails, cost controls, permissioning, and incident response, written so you can adopt it as-is.

A complete, ready-to-use governance document. Adopt it as-is, customize the bracketed fields to your environment, and put it to work today.

Instant delivery | Yours to keep, forever.

DENIED-ACTION LOG TEMPLATE PACK

Version 1.0 For AI Agent Governance in Production Environments

1. OVERVIEW

This template pack provides a standardized, production-grade **Denied-Action Log (DAL)** framework for monitoring and auditing AI agent decisions that are blocked by governance policies, cost controls, or permissioning systems. Each log entry captures: - **Why** an action was denied (policy violation, budget threshold, missing permissions). - **What** was attempted (input, output, or system interaction). - **Who** triggered the denial (agent ID, user, or system process). - **When** and **where** it occurred (timestamp, environment, agent context). - **Remediation steps** (if applicable).

This pack includes: 1. **Core DAL Entry Template** (structured log format) 2. **Policy Violation Log Template** (for rule-based denials) 3. **Cost Threshold Exceeded Log Template** (for budgetary denials) 4. **Permission Denied Log Template** (for access-control denials) 5. **Incident Response Trigger Log Template** (for escalation cases) 6. **Aggregated DAL Report Template** (for governance reviews)

2. CORE DENIED-ACTION LOG (DAL) ENTRY TEMPLATE

(Standardized JSON schema for all denials)

```
{ "log_id": "DAL-2024-05-15-1432-000123", "timestamp":
